

LEAD & COPPER RULE MONITORING AND REPORTING VIOLATION
MANDATORY LANGUAGE - TIER III

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

PWS 2460027 HIGH GABRIEL WSC has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Chapter 30, Section 290, Subchapter F. Even though these were not emergencies, as our customers, you have the right to know what happened and what we are doing (or did) to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During (52) 1st 6M2022, 2021, 2020, 3YR2019, we did not monitor or test for LCR and therefore cannot be sure of the quality of your drinking water during that time.

The table below lists the contaminant(s) we did not properly test for during the last year, how often we are supposed to sample for [these contaminants], how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which the follow-up samples were [or will be] taken.

Contaminant	Required sampling frequency	Number of samples taken	When samples should have been taken	When samples were or will be taken
LCR sample tap 1 st 6M2022	10 / 6 months	0	Jan 1, 2022 - June 30, 2022	Date: 3/20/23
LCR sample tap 2021	5 / annually	0	June 1, 2021 - Sept 30, 2021	Date: 3/20/23
LCR sample tap 2020	5 / annually	0	June 1, 2020 - Sept 30, 2020	Date: 3/20/23
LCR sample tap 3YR2019	5 / triennially	0	June 1, 2019 - Sept 30, 2019	Date: 3/20/23

What is being done?

[corrective actions]: In order to return to compliance, we must collect a set of 10 sample tap samples from registered sites between Jan 1, 2023, and June 30, 2023, and results turned in to TCEQ by 07/10/23 and those samples will be collected on 3/20/23.

We are working to correct the problem. For more information, please contact:
