- Letter from TCEQ indicated that the water quality sample is missing for the month of April. This is a record keeping error stemming from the city of Round Rock. - System water usage is operating at a normal level (144 gpm). It was noted that there may be a possible hole in the pipe under #3 well. The depth is unknown, but the leak indicator is turning backward indicating a possible leak.
- \$740 and \$150 billing to address leaks.
